

MICROSOFT EXCEL I

AN INTRODUCTORY COURSE

**Start organizing, analyzing,
and reporting data today.
No experience required.**

Even those who've never opened an Excel spreadsheet before can enter and analyze data quickly and efficiently. In this 12-hour course you'll learn the basics of:

- Creating and navigating spreadsheets
- Entering, moving, and copying data
- Formatting texts and numbers
- Getting started with formulas
- Using data entry short cuts
- Creating basic charts
- Managing worksheet windows

Cost is \$50 per student
